

Turn-off-service

Interface Design Description

Abstract

This document describes the **turn-off-service** service.

Contents

1	Overview	3
2	Interface Description	3

1 Overview

This document describes the **turn-off-service** service interface, that turns off the radiator.

2 Interface Description

The service responses with the status code `200 Ok` if called successfully. The error codes are, `400 Bad Request` if request is malformed, `401 Unauthorized` if improper client side certificate is provided, `500 Internal Server Error` if Radiator is unavailable.

```
1 PUT /radiator
```
